

As in Galileo's' time, persecution continues in Knanaya based on false beliefs and claims

പോപ്പ് ഗ്രിഗറി പതിമൂന്നാമന്റെ നിർദ്ദേശമനുസരിച്ച്, കത്തോലിക്കാ പുരോഹിതരുടെ നേതൃത്വത്തിൽ ബ്രൂണോ എന്ന നിരപരാധിയായ പണ്ഡിതനെ (ഇറ്റലി, 1600) ക്രൂരമായി പീഡിപ്പിച്ച്, നാക്കിൽ ആണിയടിച്ച്, ബന്ധിച്ച്, അവഹേളിച്ച്, തെരുവിലൂടെ നടത്തിച്ച്, പരസ്യമായി കത്തിച്ചു കൊല്ലുന്നു. വിവരങ്ങൾ ലിങ്കിൽ.

[https://en.m.wikipedia.org/wiki/Giordano Bruno](https://en.m.wikipedia.org/wiki/Giordano_Bruno)

ഇതുപോലെ അന്ധമായ വിശ്വാസങ്ങളുടെ പേരിൽ എത്ര ആയിരങ്ങൾ കൊല്ലപ്പെട്ടിരിക്കുന്നു , കൊല്ലപ്പെടുന്നു, ഉപദ്രവിക്കപ്പെടുന്നു.

Centuries ago when scientists like Bruno and Galileo presented their scientific evidences proving that the earth is not flat and the Sun does not rotate around the earth as taught by the Church, the Catholic hierarchy was not willing to accept the truth. Instead of changing their dogmas by accepting the truth, they killed and persecuted the scientists.

This attitude continues in Knanaya community today. They are led by blind beliefs and false claims. Even though we provided to Knanaya bishops, priests and community leaders DNA test results of more than 120 Knanaites showing close to 100% Indian DNA for Knanaites of today (see attached), they are not willing to accept the truth. They still teach that Knanaya is an endogamous Jewish community and continue the practice of exclusion to maintain the non-existing purity. They are weakening the Knanaya community by excluding our children who marry from outside instead of assimilating them to our community. It is so sad to see, like in Galileo's' time, persecution still continues in Knanaya based on false beliefs and claims.

Alex Kavumpurath
National Coordinator, KANA

Attached for your information is a list of 200 of my DNA relatives (last/family names were deleted for privacy reason). I have sent messages to 125 people (from #3-102 - highest relationship and from #179-203 - lowest relationship) in the attached list and got confirmation from many of them that they are Knas, non-Knas or mixed-Knas. Some others who did not respond belong to famous Kna families, so they are most likely Knanaites (see the attached list). I have the following observations:

1. It is interesting to note that out of more than 10 million customers of 23andMe, only 570 of them are my DNA relatives and they are concentrated mainly in Kerala.
2. Knanaya has 98-100% Indian DNA.
3. Knanaya and other people of Kerala who are my DNA relatives have almost same DNA composition, 98-100% Indian DNA.
4. A few of my DNA relatives are not Keralites. They have totally different DNA composition and 23andMe appears to have identified them correctly. For examples, 2 Whites (# 173 and # 192) were identified as 99.4% to 100% Europeans, one mixed White and Korean (#158) was identified as European and East Asian, etc.
5. The closeness of relationship is predicted based on the length (cM) and number of identical segments of DNA we share. Based on this standard, the first 132 individuals in the attached list (from #3-135) are my closest relatives. Most of them are Knas and/or mixed Knas (see the list).
6. My DNA relatives who are Kerala Christians have common relatives in hundreds while others share only a few common relatives (see the list).
7. The most common Maternal Haplogroup for Knas is M33a2 which is common in India. Based on this, it is possible that we are recently related through a direct line of female ancestors, but it is also possible that we match because we share much older roots in the same part of the world. This group is not common among 23andMe customers who are mainly people of West. This is a DNA evidence of mixing with Kerala women. Another major Maternal Haplogroup for Kna is U1a3.
8. My Paternal Haplogroup is R-Y6. This paternal line stems from a branch of R-M420 called R-M512. This haplogroup is still relatively common in the Middle East, as well as in Central and South Asia. R-Y6 is relatively common among 23andMe customers. This is an evidence of Kna's Middle Eastern origin. However, there is no dominant Paternal Haplogroup among Knas. That means our common lineage is mainly through our female ancestors.
9. While Knas are closely related, non-Kna relatives of Kerala do not have close relationship with their fellow Keralites. This appears to be because although they are married to fellow Keralites, they have no common lineage.
10. One of my DNA relative is an individual adopted by a European family and lives in Europe (# 14 in the list). As per the profile description she was born in a convent in Bangalore. Though she is not a member of the Kna community, she is genetically much more Kna than many others in the list.
11. Although analysis of different companies shows variances in DNA composition of individuals due to reference population in their data base, I wonder why 23andMe did not predict any clear pattern of at least "broad" Middle Eastern connection to Kna, if not to any particular community there. They do have Middle Eastern people in their data base and access to public data to compare. It may be because the present Knas do not have much DNA connection to Middle East.
12. Although the Knanaya as presently constituted is basically Indian, I do not dispute Middle Eastern origin of Knanaya since there is no dispute of Knai Thomman's Middle Eastern origin. By the time they started to practice strict endogamy (a kind of cousin marriage), they

almost became like other people of Kerala due to exogamous marriage. This nature will never change even if we include non-endogamous Kna families who marry others from Kerala. But the DNA composition will change if the children of Knas who migrated to America marry other people of America, but they still will be closely related.

Based on the forgoing information, any sensible person would conclude that there is no justification for the practice of endogamy and exclusion to protect a non-existing Jewish purity. This is yet another reason, in addition to the orders from the Oriental Congregations and court, to end this uncivil, unchristian and illegal practice which is harmful to our community. Hope that the information provided here would persuade our spiritual and lay leaderships to take decisive action to end this practice before it damages the community further.

Alex Kavumpurath

DNA Relatives List - Produced by 23andMe

Ancestry Composition
